Management Made Easy!

Northern Safety Solutions knows that it can be expensive to provide up-to-date training to our workers, while maintaining a compliant health and safety program that is cost effective. If you want to save time, money, and provide a simple yet effective management solution to your staff, NSS in partnership with Workplace Management Systems (WMS) has the solution.

While NSS provides the expertise in health and safety program development, WMS provides the platform to host all health and safety policies, SOPs, forms, as well as providing over 30 online training modules. Together, we complete the building blocks to make a safer and compliant workplace for companies in all sectors. Companies have been utilizing the Workplace Management System for the last 8 years as a cost-effective way to maintain a compliant health and safety program with the regulatory bodies.

The Workplace Management System will streamline your processes so that supervisors and managers can focus on their core jobs while reducing stress and increasing productivity. This powerful management system keeps records central and secure, making managing a simpler task while ensuring health, safety, and compliance. It would be our pleasure to assist your company in reducing your workload.

Having an effective health and safety program is an essential component to a healthy and safe work environment and a successful business.

For employers who are interested in implementing a sound health and safety program or updating an existing program, please call our office today and one of our consultants would be happy to help you.

We are booking demos of our Workplace Management System, let us show you what this system can do for you! Contact our office today to book a demo. Call to schedule or send an email to clientsupport@nss4.com
